English: B2 (IELTS 2024)

Persian: Native

Poorya Fayazi

Software Engineer

PROFILE

Dedicated Software Engineer with extensive experience in backend development, specializing in Django and FastAPI. Proven track record in building scalable web applications, optimizing databases, and implementing robust DevOps practices.

EXPERIENCE

Backend Developer | Kavianico (Iran Khodro Rep.)

April 2025 – Present

- Spearheaded the development of a booking platform for vehicle services, ensuring high availability and performance.
- Architected and implemented microservices using Django (DRF) for core functionalities.
- Developed secure OTP authentication for user login and transactions.
- Deployed and managed application components using Docker containers and Nginx reverse proxy.

Backend Developer | Amatis Dana Tech

Oct 2024 – March 2025

- Contributed to the development of news applications, improving data retrieval times.
- Optimized database queries in PostgreSQL for faster response times.
- Implemented comprehensive Pytest suite for unit and integration testing, increasing code reliability.

EDUCATION

B.Sc. in Software Engineering

University of Shomal Amol | 2019 – 2022

GPA: 18.67/20

PROFESSIONAL CERTIFICATES

Completed seventeen comprehensive courses on the Maktabkhooneh platform, including specialized modules in Django, React, Tailwind CSS, and Machine Learning.
